- ADVANCE JAVA

PROJECTS

RESTAURANT WEBSITE

In This Website I have used Html, Css and Javascript as language and Visual Studio code as tool (platform) to Run code. In this Website different types of section such as Home, menu, review, order, register, payment and about section.

WEATHER APP

In this weather app, you can get the weather details of a particular city by entering the city name or you can also get your current location weather details by clicking on the "Get Device Location" button. if you entered an invalid city name then there is shown an error message. I've used OpenWeatherMap API to get the weather details of the user entered city or user's current location.

OPEN SOURCE CONTRIBUTION

HACKTOBERFEST

I participated in Hacktoberfest Open Source Contribution. I completed 4/4 PR/MR in this Contribution. In this I have Won many Digital Rewards and also got a tree planting certificate.
